## PROFILE

Full stack developer with over 4 years of experience in creating innovative software and efficient technological solutions. Proven experience in developing, optimizing, and debugging high-performance and scalable applications. Proficient in web development and advanced database technologies. I stand out for my ability to solve complex problems, communicate effectively, and my consistent commitment to learning and adopting new technologies.

## WORK EXPERIENCE

**Lime group marketing** 2024- PRESENT  
SEO | Web developer

- In this role, my task was to improve the company's website ranking on search engines using effective tactics such as sitemaps integrated with Google Search Console, and organic traffic analysis with Ahrefs. I also made some content changes on the website using Squarespace, as well as HTML and CSS for more specific parts.

**Pinar del Rio University** 2022 - 2023  
Full Stack Developer

- In this position, I was involved in creating web pages to build a project related to artificial intelligence at my own university. The project was called Tocororo, and its main function was to filter and analyze various indicators of scientific publications by doctors and other scientific categories related to our university.

**Pinar del Rio University** 2024 - 2025  
teaching assistant

- Since my second year of university, I have been a teaching assistant in the courses Programming and Object-Oriented Programming, using Java as the main language. This experience allowed me to reinforce key programming skills and support students in both theoretical and practical aspects, while also developing pedagogical and teamwork abilities, thus strengthening my technical and professional training

## EDUCATION

**Pinar del Rio University** 2022 - 2025  
Computer Engineering
